Robin Guenther and Gail Vittori release a new, comprehensive look at sustainable healthcare design initiatives

Perkins+Will is excited to congratulate Global Sustainable Healthcare Design Leader and Principal Robin Guenther and Gail Vittori, LEED Fellow, on the release of Sustainable Healthcare Architecture, Second Edition. The new edition incorporates the latest sustainable design approaches for hospitals and other healthcare facilities and provides a comprehensive look at emerging developments within the field.

“We’re constantly pushing the boundaries of what we mean when we talk about sustainability,” said Guenther. “The second edition really reflects the increased focus on issues such as materials transparency and resilient design, to name just a couple.”

With 55 new project case studies, profiles of leading healthcare systems and updated research, Sustainable Healthcare Architecture is a must-read for anyone interested in creating sustainable places of healing and wellness.

Robin is an expert in green healthcare design and a strong advocate for linking public health, regenerative design and sustainability. Her built work has helped shape healthier, more welcoming facilities for nearly every major medical institution in New York City. Robin is active in many organizations that focus on the regulatory environment and healthcare construction standards including The Centers for Health Design’s Environmental Standards Council and the AIA-New York Health Facilities Committee. Her expertise has been featured on NPR’s “Marketplace”, “The State of Things”, and “MarketWatch” as well as in pieces for Architectural Record, GreenSource, and Environmental Building News.
